

The C.U. Ethics in Mathematics Society presents:

Dr. Maurice Chiodo

Ethics for the working mathematician

Seminar 3

DOING YOUR JOB

Do mathematicians have the right to voice moral objection? Is it even possible in our line of work? If so, how would we recognise when to object, how would we begin to go about it, and what sort of obstacles might we encounter when trying to do so? Those who seek our services have the ability to manipulate and coerce us, and defending against such coercion is a highly non-trivial task. Handling these situations requires real-life experience of them, which is hard (but not impossible) to teach.

Tuesday 31 October 2017

16:00-17:00

**Centre for Mathematical Sciences
MR3**

This talk is part of the C.U. Ethics in Mathematics Society (CUEiMS) series
